

## Vivi Veras

+55 (98) 98721-6857 | [dveras2310@gmail.com](mailto:dveras2310@gmail.com) | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

### Full-Stack Engineer

- 3+ years of hands-on experience in building scalable web applications using React, TypeScript, Node.js, Python, and DevOps tools such as Docker, AWS and Terraform.
- Committed about writing clean, maintainable code and improving system reliability through automation and testing.
- Seeking to drive innovation and performance in dynamic engineering environments.

### Core Skills

Python | Java | TypeScript | C# | JavaScript | Bash | React | TailwindCSS | I18N | HTML | CSS | Bootstrap | Figma | Node.js | ExpressJS | Jest | Spring Boot | .NET | PostgreSQL | MySQL | MongoDB | Redis | Docker | AWS | Kubernetes | Terraform | Git | GitHub Actions | Terraform | Linux | JIRA | OOP | JWT | Cypress | Scrum

### Experience

#### ***Full-Stack Engineer | GX4 Software | Jun 2024 – Present***

Software house specialized in Website Development for ERP Systems, CRM, Android Applications and Financial Systems.

- Developed and maintained scalable web applications using React, I18N, TypeScript, TailwindCSS, and Testing Library.
- Built RESTful APIs with ExpressJS and Spring Boot, integrating PostgreSQL and MongoDB for reliable data storage.
- Streamlined CI/CD pipelines with Docker, reducing deployment errors by 30%.
- Collaborated with cross-functional teams to deliver new features under agile methodologies, ensuring code quality through unit and integration testing.

#### ***Programmer Team Manager | APAM (NGO) | Aug 2023 – Jul 2024***

Association that fights tirelessly for the animal cause, through rescue, treatment, castration, maintenance and donation of these animals.

- Led a volunteer team of 5 developers to deliver a full-stack application using React, Python, and MySQL.
- Architected the platform's backend and infrastructure, implementing CI/CD with GitHub Actions, reducing release cycle time by 40%.
- Used GitHub Projects and JIRA to manage agile workflows and ensure team alignment.
- Facilitated code reviews and mentoring sessions to ensure knowledge sharing and maintain code quality, reducing bug rate in production by 30%.

### ***Undergraduate Researcher | LESC, UEMA — Jul 2022 – Sep 2023***

Laboratory of Experimentation and Simulation in Heat of the State University of Maranhão (UEMA):  
Research laboratory specialized in the development of scientific projects in the area of heat transfer.

- Designed and implemented responsive UI components using JavaScript, and Figma for academic tools.
- Automated research workflows with Python, including web scraping and report generation, saving over 6 hours weekly.
- Developed machine learning models with scikit-learn and Keras, contributing to two peer-reviewed publications.
- Collaborated closely with professors and researchers to support data-driven studies.

### **Education**

**Recode Pro** — Full-Stack Development Program (2024–2025)

*Technologies: HTML5, CSS3, Bootstrap, JavaScript, NodeJS, Express, ReactJS, Java, Spring Boot, MySQL, MongoDB, Docker*

**SECTI MA** — Data Science Program (2023–2024)

*Technologies: Linux, Bash, Python, Automations, JavaScript, NodeJS, Data Analysis, Machine Learning, Pandas, scikit-learn, Docker*

### **Languages**

- Portuguese (Native)
- English (B2–C1)
